

BOWEL NOSODES IN THEORY AND PRACTICE

CONTENTS

Preface

Chapter 1 Origins and Development

Sources and laboratory techniques. The principle workers and their influence on the nomenclature. Early conventional work and ideas about intestinal toxæmia. The phases of disease in relation to the bacterial bowel picture. Dr Bach's reservations about pathogenicity. Expanding and developing the homeopathic connection. Bowel function in relation to health. Terminology and bacteriology.

Chapter 2 The Practical Implications

The difference from other remedy relationships of the associated remedies. The observational basis for the concept of associated remedies. The lists of associated remedies. Modern drugs and the incompleteness of the lists. Chemical connections within the lists. Miasmatic connections of the bowel nosodes. The totality of symptoms. Are the bowel nosodes truly homeopathic? Are the bowel nosodes true nosodes? The relationship of the bowel nosodes to health and diet. The clinical situation of the bowel nosodes in animals.

Chapter 3 The Clinical applications

The usefulness in all species. The taking and use of a faecal swab. The other ways of using the nosodes clinically. Themes of the individual bowel nosodes. Dosage considerations. An illustrative case from John Paterson.

Chapter 4 The Morgan groups

Morgan Bach, Morgan Pure and Morgan Gaertner.
Indications and materia medica

Chapter 5 Dysentery Co

Indications and materia medica

Chapter 6 Proteus

Indications and materia medica

Chapter 7 Sycotic Co

Indications and materia medica

Chapter 8 Gaertner Bach

Indications and materia medica

Chapter 9 Bacillus no 7

Indications and materia medica

Chapter 10 The smaller groups

Bacillus No 10, Mutabile, Faecalis, Coccal Co and Polybowel
Indications and materia medica

Appendix

The expanded associated remedy lists taking account of modern knowledge
